INSTRUCTION MANUAL

No.120SM

Kitagawa HYDROGEN SULPHIDE DETECTOR TUBES

- ★ READ CAREFULLY THIS INSTRUCTION MANUAL AND THE INSTRUCTIONS OF THE ASPIRATING PUMP PRIOR TO USING THIS PRODUCT.
- \star do not discard this instruction manual until all of the tubes in this box ARE USED UP.

1. PERFORMANCE:

Measuring Range	0.05 - 0.6%	0.1 - 1.2 %
and Sampling Time:	(1pump stroke)	(1/2 pump strokes)
r c	(1 minute)	(0.5 minutes)
<u>Graduations on the detector tube are based on 1 pump stroke.</u>		
Colour Change:	Pale blue - Dark brow	n
Detectable Limit:	0.001% (1 pump strol	(ke)
Operating temperature:	0 - 40 °C (32-104°F)	(No temperature correction is necessary.)
Aspirating Pump:	Model AP-20, AP-208	5, 400B, AP-1, AP-1S or 400A

CAUTION 1. DETECTOR TUBE CONTAINS REAGENTS 2. DO NOT TOUCH THE REAGENTS DIRECTLY ONCE TUBES ARE BROKEN. 3. KEEP THE TUBES OUT OF THE REACH OF CHILDREN.

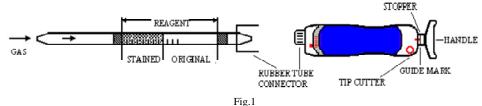

NOTICE

- 1. USE ONLY WITH PUMP MODELS AP-20, AP-20S, 400B, AP-1, AP-1S OR 400A. OTHERWISE, CONSIDERABLE ERROR IN INDICATION MAY OCCUR.
- 2. DON'T USE FLOW CONTROL ORIFICE WITH THIS TUBE. (FOR MORE DETAIL, REFER TO THE INSTRUCTIONS OF THE ASPIRATING PUMP.)
- 3. BEFORE TESTING, CHECK THE ASPIRATING PUMP FOR LEAKS (REF. ITEM 8). ANY PUMPS SHOWING SIGNS OF LEAKAGE SHOULD BE CORRECTED BEFORE USE.
- 4. DON'T USE THIS TUBE OUTSIDE THE STATED OPERATING TEMPERATURE RANGE. 5. STORE TUBES IN A COOL AND DARK PLACE (0-25 °C/32-77°F), AND USE BEFORE

EXPIRATION DATE PRINTED ON TOP OF THE BOX.

6. PRIOR TO USE, READ CAREFULLY ITEM 9 "USER RESPONSIBILITY".

2. SAMPLING AND MEASUREMENT:

① Break both ends of detector tube

CAUTION SAFETY GLASSES AND GLOVES SHOULD BE WORN TO PREVENT INJURY FROM SPLINTERING GLASS.

- 2 Insert the detector tube into aspirating pump securely as shown in Fig.1 (Arrow mark shall point to the pump.)
- 3 Align the guide marks on the shaft and stopper of the aspirating pump.
 4 Pull the pump handle at full stroke until it locks and wait for 1 minute or until the completion of sampling is confirmed with the flow indicator of the pump (See descriptions about the flow indicator in the instructions of the pump).
- 5 On completion of sampling, read the scale at the maximum point of the stained layer.
- $\widehat{6}$ If the discolouration is over the scale, change the tube and pull 1/2 strokes as stated below.
- \bigcirc Insert the new tube to the pump inlet. Pull the handle at 1/2 strokes (to 50 ml line), and it will be automatically locked. Leave it for 0.5 minutes as it is.
- Remove the detector tube from the pump and read the concentration.
- $\overline{9}$ Then multiply the reading value by 2.

- SPECIAL NOTE: I. The scale is calibrated at 20 °C (68°F) and 1013hPa. Readings obtained in other circumstances should be corrected (REF. ITEM 3).
 - II. When the maximum point of the stained layer is unclear or obliquely, read the scale at the centre between the longest and shortest points.

3. CORRECTION FOR AMBIENT CONDITIONS:

- ① Temperature; No corrections are necessary.
- 2 Humidity; No corrections are necessary.

True concentration = Tube reading \times 1013

Atmospheric pressure (in hPa)

4. INTERFERENCES:

Sulphur dioxide does not change this tube by itself but the coexistence of more than 0.3% with Hydrogen sulphide will give lower readings. Ammonia produces a blue stain and Methyl mercaptan produces a pale vellow stain but each coexistence with Hydrogen sulphide does not affect accurate readings.

5. CHEMICAL REACTION IN THE DETECTOR TUBE:

 $H_2S + CuSO_4 \rightarrow CuS$

6. DISPOSAL OF TUBE:

USED TUBES SHOULD BE DISCARDED CAREFULLY ACCORDING TO RELEVANT **REGULATIONS, IF ANY.**

7. HAZARDOUS AND DANGEROUS PROPERTIES OF HYDROGEN SULPHIDE :

- 10 ppm (NOTICE OF INTENDED CHANGES)
- ◆ Threshold Limit Value established by the American Conference of Governmental Industrial Hygienists, 2000.

8. INSPECTION OF ASPIRATING PUMP:

Checking for leaks;

- ① Insert sealed, unbroken detector tube into the pump.
- ⁽²⁾ Align the guide marks on the shaft and stopper of the pump.
- ③ Pull the handle at full stroke and wait for 3 minutes.
- 4 Unlock the handle and allow it to return slowly into the pump by holding the cylinder and handle Securely.

(5) If the handle returns completely to the original position, the performance is satisfactory. Otherwise, refer to maintenance procedure in the pump instructions to correct the fault.

9. USER RESPONSIBILITY:

It is the sole responsibility of the user of this equipment to ensure that the equipment is operated, maintained, and repaired in strict accordance with these instructions and the instructions provided with each Model AP-20, AP-20S, 400B, AP-1, AP-1S or 400A aspirating pump, and that detector tubes are not used which are either beyond their expiration date or have a colour change different to that stated in the Performance specifications.

The Manufacturer and Manufacturer's Distributor shall not be otherwise liable for any incorrect measurement or any damages, whether damages result from negligence or otherwise.
