# **STYRENE**

#### 1. PERFORMANCE

1) Measuring range Solution Number of pump strokes 1  $(100 \text{m} \, \ell)$  2.5-150 ppm 2  $(200 \text{m} \, \ell)$  2  $(200 \text{m} \, \ell)$  3.5 Sampling time 1  $(100 \text{m} \, \ell)$  2  $(200 \text{m} \, \ell)$  3.6 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substitute of pump stroke 1 minute  $(100 \text{m} \, \ell)$  3.5 This is a substit

3) Detectable limit ∴ 0.5 ppm (200mℓ) 4) Shelf life ∴ 3 years 5) Operating temperature ∴ 0 ~ 40 °C

6) Reading : Direct reading from the scale calibrated by 1 pump stroke

7) Colour change : White→Yellow

## 2. RELATIVE STANDARD DEVIATION

RSD-low: 15% RSD-mid.: 15% RSD-high: 10%

#### 3. CHEMICAL REACTION

A polymer of Styrene is produced by sulphuric acid.

$$CH: CH_2 \longrightarrow \begin{pmatrix} -CH-CH_2 - \end{pmatrix}$$

### 4. CALIBRATION OF THE TUBE

GAS CHROMATOGRAPHY

#### 5. INTERFERENCE AND CROSS SENSITIVITY

Substance		ppm	Interference	ppm	Coexistence
Acrylonitrile	FIG.1		The accuracy of readings is not affected.	400	Lower readings are given.
Butadiene	FIG.2	3	Similar stain is produced.	5	Uneven discolouration is produced and higher readings are given.
Formaldehyde	FIG.3		"	15	Yellowish orange stain is produced and higher readings are given.
Acetaldehyde			"	350	Similar stain is produced and higher readings are given.
Methyl alcohol			The accuracy of readings is not affected.	0.35%	Pale discolouration is produced and higher readings are given.
Ethyl alcohol			"	0.18%	"
Ethyl acetate			"	700	"
Butyl acetate			"	700	"

(NOTE)

In case of 2 pump strokes, following formula is available for actual concentration. Actual concentration =  $1/2 \times \text{Reading value}$ .
